

Andy Cohen Back For 2nd Season With N.O. Pels

NEW ORLEANS, Feb. 23 (AP) — Andy Cohen, preparing to start his second season as manager of the New Orleans Pelicans, learned the hard way that the baseball season isn't over until the last out.

Cohen had his team in the Southern Association first division for 152 of 154 games last season. On the last day the Pelicans dropped from fourth to sixth place.

Cohen came to New Orleans after leading Denver of the Western League to two pennants and two second place finishes during four years as manager there.

Cohen had a long and varied baseball career as player, manager, scout and manager again.

A three-sport standout at the University of Alabama, he left school in 1925 at the end of his junior year. He signed his first professional contract that year with Waco, then in the Texas League.

Before the season was over the New York Giants bought Cohen's contract for the then fabulous sum of \$25,000. But the Giants didn't need any young infielders then. They had Rogers Hornsby at second and Travis Jackson at short-stop.

So it was 1928 before Cohen got his first chance with New York. In the meantime, he played for Buffalo in the International League. While there, he set an all-time league fielding record for second basemen. He also had a .353 batting average one season.

He didn't last long in the major leagues. After three seasons he was sent to Newark and then to Indianapolis.

A few years later he started his managerial career at Pine Bluff, Ark. He went to Dayton, Ohio, next and then Elmira.

World War II interrupted his baseball career. When he was discharged, he took over as manager-owner of El Paso, Tex. He held that job two seasons, 1945-46. The next year he was a scout for the Boston Braves of the National League.

In 1948 he resumed his career as a manager. This time he was at Eau Claire, Wis. He stayed there until 1950 when he took over at Denver.
