

Weaver Tough on Fences

Unless he's changed considerably, one thing that Earl Weaver, new pilot of the Baltimore Orioles, won't be short of is competitive spirit, according to one of our informants who was close to the Western League scene.

Weaver was traded by Omaha to Denver, and Andy Cohen, Denver manager, was asked why he picked Weaver over other second sackers who were his equal if not better.

"When you want to win a lot of ball games you've got to have at least one player on the club who wants to win so badly he can taste it," Cohen replied. "Weaver is that kind of a guy. Why, if you told him he would win a ball game by running through the centerfield fence, he would try it."

Which leads to the question: How strong are the centerfield fences going to be for Weaver in the American League?
