

Cohen's Challenge

ANDY COHEN, former Eau Claire Bears manager who returns to pilot the Denver Bears in 1958, is well aware of the big challenge he faces in succeeding Ralph Houk as pilot of the New York Yankees' chief farm club.

Cohen had managed Denver in the Western League as an independent operation with some Milwaukee Braves ties. But when the Yankees took over Denver as a new American Assn., entry, Andy went to New Orleans and then to Indianapolis.

Now, busy readying Denver for the American Assn. race, Andy is on the spot because the Bears have had strong teams the past three seasons and were the best minor league team in baseball last fall when they won the Little World Series.

Cohen is the only manager in the Yankee chain except for Casey Stengel who had not played with the Yanks at one time or another. But he has been warmly welcomed into the New York family and believes the Bears won't be slighted in talent because he is a newcomer.
