

Andy Cohen Is Fired As Pilot Of Indianapolis

INDIANAPOLIS — AP —

Andy Cohen was fired today as manager of the Indianapolis Indians of the American Association after one season at the helm.

Ownie Bush, president of the community owned baseball club, said no successor has been selected.

Cohen came to Indianapolis this year after two seasons managing the New Orleans Pelicans of the Southern Association. Indianapolis finished sixth this past season with 74 victories and 80 defeats—the first time in his 12 year managing career Cohen has finished under .500.

The Indians, who won the association pennant and Little World Series last year, have been having attendance trouble this year. Recently, the Chicago White Sox, with whom the Tribe has a working agreement, rescued the club from financial collapse with a loan which eventually will come to nearly \$60,000.
